Appointed & Promoted

Medicine

K. J. R. WIGHTMAN, the former chairman of the Department of Medicine of the Faculty of Medicine, has been appointed director of the Division of Postgraduate Medical Education and associate dean of the Faculty. He will continue to hold appointment as a professor in the Department of Medicine.

Keith John Roy Wightman was born in Sandwich, Ont. He earned his M.D. from the University of Toronto in 1937. After a one-year research fellowship at Cambridge University, he continued post-graduate training at the Toronto General Hospital 1938-42 and then served four years with the Royal Canadian Army Medical Corps in Britain and N.W. Europe, and was mentioned in despatches. He joined the Faculty of Medicine of U of T in 1946 and was head of the Department of Therapeutics 1953-60. He has been Sir John and Lady Eaton Professor of Medicine since 1960. In his new post he succeeds R. IAN MACDONALD, who retired on June 30.

Computer Science

ROBIN WILLIAMS has been appointed as the manager of the Users' Service Group

of the Institute of Computer Science, and commenced his duties on Oct. 1. Mr. Williams was educated at the University of Bristol, B.Sc. '55, University of Toronto M.A. '59, and McMaster University, M.B.A. '68. His computer experience dates back to 1955 and includes work as a programmer at the Bristol Aircraft Co., at AVRO Aircraft Co., and at IBM. Since 1961 he has been at the Ontario Hydro, first as a numerical analyst, then as an applied mathematician, and most recently as a supervising analyst in the Special Studies Section. In his position at the Institute of Computer Science, Mr. Williams will supervise the Users' Service Group which has the important task of maintaining the interface between ICS and its users, providing programming advice, distributing documentation and offering tutorials and lectures.

OCTOBER 16 DEADLINE

University of Toronto Bulletin is published by Department of Information, Room 225, Simcoe Hall. All material for the next issue should be in the hands of the editor, Mrs. Winogene Ferguson (928-2102) by noon on the 16th of October.

The President receives overwhelming vote of confidence after

Interim disciplinary procedures approved by mass meeting

President Claude Bissell's statement on interim disciplinary procedures was overwhelmingly endorsed last week at a rally in Convocation Hall attended by probably 2,000 students and staff members who filled the floor and platform, the balconies and the aisles.

The reception given to the President was warm and friendly, in marked contrast to the boos and jeers which greeted him only a week before. Then, by a vote of 300 to 25—all that remained of an original attendance of between 900 and 1,000—Dr. Bissell was given one week in which to yield to six Students' Administrative Council demands.

Last week's rally was called to decide upon a course of action in the event that the President's response was not considered to be satisfactory. But the atmosphere of the October 1 meeting was quite different from that of September 25. Prolonged applause, cheers, and a standing ovation welcomed Dr. Bissell as he went to the platform. Applause rang through the hall again when the chairman, Arthur McIlwain, president of the Engineering Society, called on Dr. Bissell to speak.

Applause came when the President said that the working paper on discipline of the Committee of Presidents "is not the policy of the University of Toronto". There was another hearty burst when Dr. Bissell emphasized that the Campbell Committee Report was the one "that is relevant to the University of Toronto". The clapping was thunderous when the President announced that he would "proceed immediately with the formation of an interim, University-wide disciplinary body in the spirit of the Campbell Report."

Gus Abols, president of SAC, said he personally felt that the President's statement was "an acceptable one". Michael Vaughan, president of the Graduate Students' Union, declaring that "it is our turn to be reasonable and compromising", moved formally that Dr. Bissell's statement be accepted as a satisfactory answer to the six SAC demands.

When Mr. McIlwain called for a vote on the motion, from hundreds of voices came a roof-shaking "Yes!" The opposition "No!" was faint in comparison. As

the rally was adjourned, Dr. Bissell left the hall to more cheers, more applause, and the singing of "For he's a jolly good fellow."

During the past few years [Dr. Bissell said] this University has taken many steps to involve both students and teaching staff in running its affairs. One outstanding example is the joint effort by students and staff that resulted in the implementation of the Macpherson Committee Report on Undergraduate Instruction in the Faculty of Arts and Science. This report revolutionized the curriculum in the largest faculty of this University. This revolution was brought about by students and academic staff working together.

Two days ago there was made available to every member of the University community another important document—the Campbell Committee Report on Disciplinary Procedures. Again, this is the report of a joint group of students, academic staff and administrators of the University. It will have a profound and far-reaching effect on disciplinary policy and procedures at this University.

In the near future, every member of the University will receive a copy of an even more significant document—the report on the Commission on University Government. This report is the work of a group consisting of four students and four members of the teaching staff and the President of the University. The four students and four faculty were elected to this committee by a campus-wide election. The committee is chaired jointly by one of the members of the faculty and by one of the student members.

These are merely three of the more significant developments in staff and student co-operation that have taken place on this campus in the last few years. There are many others.

During the last ten days, I have been accused of ignoring the staff and students of the University. In reply to that, I would say that it was at my initiative that this University established the three committees that I have described. I would also say that I have never wavered in my belief in the need for staff and student participation in university government, and I have spent

the greater part of my time, during the last year, in conducting or joining in discussions that would lay the ground work for such participation.

There is, I understand, some fear on the campus of rigid and arbitrary action that would stifle dissent. Nothing in the recent history of the University justifies that fear. I can think of several examples where this University has resisted pressures to discipline individuals for what they said or wrote; I can think of none where it has yielded to such pressure.

I appeal to those of you in this hall and to all members of the University to look objectively at the record. I appeal to you to do nothing that will prevent the full, quick, and informed discussion of the Campbell Committee Report and, still more, of the report of the Commission on University Government.

Now I will comment on issues raised in recent discussions.

The paper issued by the Committee of Presidents of Universities of Ontario is not the policy of the University of Toronto. With the other members of that committee, I agreed to the circulation of that paper on the clear understanding that the statements in it did not speak for any university and were not in any way binding on any university. It was a working paper that the Committee of Presidents agreed should be circulated only for purposes of discussion. I recognize the apprehension that it has raised among some members of this University, particularly when we do not yet have a system of governance that is adequately representative of the whole University community.

We have now received the report from the Campbell Committee; this is the report that is relevant to the University of Toronto. This is the report that will shape University policy on discipline in the University of Toronto. A parity committee of academic staff and students will be appointed immediately to initiate discussion, to formulate agreed recommendations, and to facilitate implementation. I express the hope that this committee would give high priority to the analysis of the meaning of disruption, and would base its conclusions and recommendations on a campus-wide dis-

cussion. Surely there could then be no fear that the University would adopt a narrow and repressive attitude.

In accordance with a resolution passed unanimously by the Caput at its meeting yesterday, I shall proceed immediately with the formation of an interim, University-wide, disciplinary body in the spirit of the Campbell Report, and I shall recommend its establishment to the Board of Governors. This body, which will be a parity body, would discharge the function of the Caput and would determine its own procedures. It is my hope that it will be rapidly superseded by the implementation of the Campbell Report.

It has been urged that the Campbell Report be published as soon as it is received by the President. This was, in any event, my intention, and it has been done.

I urge that the important thing for us is to get on as quickly as we can with the job of examining the Campbell Report. This is the only way in which we can hope to have what the members of the administration and all members of the University have always wanted—a disciplinary system covering both students and staff acceptable to all members of the University. I also ask you to play your full part in the still more important discussion of the organization and governance of the University that will arise from the Report of the Commission on University Government. Let us make this a year when discussion leads to action, and analysis to change; a year for this University of transformation and renewal.

Faculty discussion group

Interested faculty members are invited to participate in an informal discussion group which meets every Wednesday from 1 to 2 p.m. in the Chaplain's office, Hart House.

The group presently consists of physicists, philosophers, mathematicians, theologians and natural scientists. For any one who feels trapped in his own specialty, this is an ideal opportunity for intellectual cross-fertilization. Participants usually bring their lunches and talk while eating. Please call 2448.

Library Orientation Program

Special subject seminars

Interested groups of undergraduate or graduate students may arrange for a special seminar given by the Reference Department on reference materials and bibliography in a particular subject area. Professors are urged to arrange such seminars at any time suitable for their classes. Contact Miss V. Henderson (928-2279) for Humanities and Social Sciences. For Science and Medicine contact Mrs. M. Mathews (928-8617).

General reference seminars

Introductory seminars on reference materials and library resources are given by the Reference Department. Anyone interested may sign in the Catalogue Hall for seminars offered at various times during the fall term.

Individual tours for faculty members and graduate students

The Reference Department would be glad to give an introduction to the reference collection and Reference services to

any graduate student or faculty member. Come to the Reference desk or phone the Reference Department to make an appointment (928-2279).

Stack tours

Tours of the stacks are available on request. Apply at the Circulation Desks (Humanities and Social Sciences or Science and Medicine). Tours are also available in the College Libraries and, for Extension Students, at 47 Queen's Park Crescent East.

Tape and slide presentations

During the coming year short tape and slide programs will give a brief introduction to library services. Three programs have been prepared:

1. Introduction to the Library
2. Use of the Humanities Stack
3. Use of the Catalogues

These are being shown on self-operated equipment at both entrances to the Library. Group showings may be arranged. Contact Miss S. Laidlaw (028-2305 or 2287).
